Report ID: RES0047

Date: 2025-11-09T18:38:57.007453

Patient Name:	N/A	Referring Dr.:	N/A
Age:	N/A	Modality:	N/A
Sex:	N/A	Exam:	N/A
DOB:	N/A	Source File:	RES0047.mp3

CLINICAL HISTORY:

The patient reports experiencing chest tightness, shortness of breath, and a productive cough with greenish sputum. The cough has been present for a few years but worsened over the past three days. The patient has a history of smoking and has been diagnosed with COPD and chronic bronchitis. The patient also has high blood pressure and had their gallbladder removed a few years ago.

FINDINGS:

1. Cough

The patient has had a cough for a few years, which has worsened over the past three days. The cough is productive with greenish sputum and is associated with wheezing.

2. Shortness of breath

The patient experiences shortness of breath, which has worsened with the cough. It is triggered by physical activity.

3. Chest tightness

The patient reports chest tightness, which is uncomfortable but not painful.

4. COPD

The patient has a history of COPD and uses inhalers, including Spiriva and a short-acting beta agonist.

5. Smoking history

The patient smokes about a pack of cigarettes per day and has been smoking for approximately 35 years.

6. High blood pressure

The patient is on amlodipine for high blood pressure.

IMPRESSION / DIAGNOSIS:

The patient is experiencing a COPD exacerbation, likely triggered by an infection or environmental factors.

RECOMMENDATIONS:

- Increase use of short-acting beta agonist inhaler.
- Consider antibiotics and/or steroids if symptoms indicate a moderate exacerbation.
- Seek emergency care if symptoms become severe.
- Perform a COVID-19 swab to rule out viral infection.
